

Tuesday 15 September 2009 Room B, Exhibition Hall

Please note that all VIND2009 sessions will feature Swedish-English interpretation.

09.00–10.30 Opening session

Moderator: Matthias Rapp, Swedish Wind Energy Association

Presentation of winner in Swedish Wind Energy's national photo competition.

- **Ola Alterå**, Ministry of Enterprise, Energy and Communications
- **Bruce Douglas**, European Wind Energy Association
- **Anders Wangby**, Invest in Sweden – Benefits of investing in Sweden
- **Magnus Jiborn**, Sydsvenska Dagbladet

10.30–11.00 Coffee break

11.00–12.30 Electricity grid - transmission within Europe

This session will cover future plans and challenges for export/import cables to Germany and Lithuania and will also address what further grid strengthening will be needed in the Baltic countries, in Germany and the rest of Europe.

Moderator: Anders Richert, Swedenergy

- **Georg Wilhelm Adamowitsch**, European Commission – Kriegers Flak: a model for a European electricity system
- **Sture Larsson**, Svenska Kraftnät – Expanding the grid in Sweden and to other countries

Panel discussion also including Urban Keussen from E.ON Netz and Johannes Schiel from the VDMA.

12.30–14.00 Lunch break

Organiser

In cooperation with

14.00–15.30 Wind measurement and Output calculations

Launching the results of a newly completed study, the second session will compare between different measurement methods. Presentations will consider the drawbacks and virtues of the different techniques available to measure wind. This will include calculated wind-mapping, LIDAR, SODAR and measurements with traditional anemometers, all of which will be compared to a wind turbine in place.

Moderator: Lars Landberg, Garrad Hassan

- **Hans Bergström**, Uppsala University – What is the MIUU-method?
- **Günther Warmbier**, Telecon – What is SODAR and LIDAR?
- **Daniel Marmander**, Triventus – New report, Which measurement method is best?

Panel discussion also including Gunnar Fredriksson from the Swedish Wind Energy Association.

15.30–16.00 Coffee break

16.00–17.15 Support system and trading in green values

This session will examine different ways to buy and sell green values between countries and explore how Sweden and other countries could be able to utilise the flexible mechanisms that the new EU Renewables Directive provides for.

Moderator: Per Rosenqvist, Statkraft Financial Energy

- **Claes Hedenström**, Vattenfall – What are the options for other countries to buy our green wind-generated electricity?
- **Pernilla Winnhed**, Swedish Ministry of Enterprise, Energy – Political initiatives and support systems
- **Matthias Rapp**, Swedish Wind Energy Association – What will the flexible mechanisms mean for Swedish wind power?

Panel discussion also including Mark Ennis from Airtricity.

17.15–17.30 Closing session

19.00–21.00 Reception at Stockholm City Hall

The Swedish Presidency of the EU
